

SEC DISCLOSURES

Take a virtual tour

Elevate your public company intelligence for proactive compliance

Leverage our AI and machine learning technology for precision search and analysis of 20+ million SEC EDGAR documents and 350+ form types from 1994 forward for all U.S. publicly traded companies.

AI search features to help guide your research.

1

Targeted Filters for Precision Searching

Target your search by form section, footnotes, clauses, discussion sections, tables, revenue, location, and more.

2

Results Provided in Context, Not Just as Isolated Keywords

Results that display the entire paragraph, item, and section where keywords are found within an entire filing, allowing you to skip the step of having to go back to the source document.

3

Search by Concepts – No Guessing with Proximity Operators

Our AI takes the guesswork out of trying to determine where your search term may appear in a form. Our CompanyIQ Smart Search feature allows you to search by concept saving you the time and extra step of having to specify that your keyword is within a certain number of words of another word.

4

Recursive Search for Ease

Build on your initial search by adding successive search criteria to the companies from your initial results. By layering search criteria, you can drill down to disclosures that meet each additional iteration of your initial search.

5

Smart Peers and ESG/SASB Sectors

First and second degree peers auto populates based on your target company's SEC proxy disclosures. Add additional peers using Sustainability Accounting Standards Board (SASB) sectors.

Largest searchable public company intelligence database.

MyLogIQ is the most encompassing public company intelligence provider in the industry. Research 12,000+ public companies, eight indices, 11 SASB sectors and 77 subsectors, and 7 million+ contracts.

Deep History & Even Deeper Sources

Our database allows you to search 20+ years of SEC EDGAR data, 20+ million documents, and all active companies each year.

Search Result Analytics Ensure a Comprehensive Search and Allow Further Narrowing of Your Results

Our AI will do the thinking for you if you are not sure which search parameters to use. Start with broad search terms to ensure complete results and then use our CompanyIQ Analytics visual filters to validate and further narrow your results by form type, form item, footnote, FYE, and more.
